Light snow showers (night)	Light snow showers	Sleet showers	Light rain	Dull	Light rain
Precipitation probability					
50%	50%	60%	40%	20%	70%

Forecast for Wednesday 17 Nov 2021

Weather: Occasional showers will continue to spread east, blown in on strong to gale force winds. A few bright or sunny breaks likely inbetween, especially for the Angus and Aberdeenshire Hills which will see only isolated showers. Showers falling as snow to 500-600m initially, but slowly rising to munro level by midday. Showers tending to fade through evening ahead of thicker cloud and periods of rain and drizzle spreading northeast.

Chance of cloud free mountain/hill tops above 800m: 80% east, 40% west. Falling widely 10% through evening.

Visibility: Showers will often bring cloud down to 600-800m so visibility will be variable and fast changing above this level due to cloud and snowfall. Neighbouring slopes likely obscured by rain below this, but only for 15-30 minutes at a time. Cloud becoming increasingly extensive above 400-500m through evening. Cloud much more broken across the more sheltered east.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

A few centimetres of fresh snow may build up through morning, especially on west facing slopes west of the A9.

Forecast for Thursday 18 Nov 2021

Weather: A return to mild conditions as thick cloud and moist air spreads in from the west. Persistent strong to gale force winds and extensive low cloud will be significant hazards. Any lying snow will quickly melt as rain and drizzle set in, but this will be mainly light. Best shelter across the Angus and Aberdeenshire Hills, very mild here too.

Maximum wind: West 30-35mph gusting 50mph, easing a little through the day. Winds reaching 60mph across highest ground through morning.

Chance of cloud free mountain/hill tops above 800m: Virtually no chance.

Visibility: Cloud will be extensive and persistent above 400-500m, perhaps lower at times. Rain will turn lower slopes hazy. Little change expected through the day. Much brighter with cloud more broken across the Aberdeenshire Hills.

Temperature: **Glens:** Plus 12-14 Celsius.
At 800m: Around plus 7 Celsius.
Freezing level: Well above summits.
